

What are the differences between the WiiM Amp and the WiiM Amp Pro?

Post-Filter Feedback (PFFB) Amplifier

This amplifier elevates sound quality with Post Filter Feedback (PFFB) technology, delivering load-independent performance for consistently exceptional audio.

ESS ES9038Q2M DAC and TI OP AMP

Equipped with the cutting-edge ESS ES9038Q2M premium DAC and TI OP AMP, it achieves industry-leading low distortion and a wide dynamic range. It boasts a 120 dB (A-weighted) SNR and a THD+N of -105 dB at 5W.

State-of-the-Art Wireless Connectivity

Featuring the latest Wi-Fi 6E and BT 5.3, along with dual antennas, it provides rock-solid wireless audio streaming over both Bluetooth and Wi-Fi.

Advanced Thermal Design

Designed with an innovative thermal management system that includes copper, aluminum, and graphene heat sinkers, it ensures reliable performance even in the most demanding conditions.
